Company overview

Zeengal Solutions is pleased to submit this proposal for the Grievance System Application (Android) and Control Panel (Web Software) for **Shahjahanpur Municipal Corporation**, Uttar Pradesh, India. We welcome the opportunity to work with you on this exciting project.

Zeengal Solutions is an **ISO 9001:2015 certified** IT Company aims at providing the quality services regarding the design, development & marketing. We provide comprehensive and integrated IT services that includes software development, Website design and development, Mobile application development, Mobile Website development, Digital Marketing, Graphics Design as well as development and implementation of high-quality business domain applications.

Our goal is to provide high quality and cost-effective services to the internet and IT outsourcing community and business who wish to maximize their reach by harnessing the unlimited power of information technology.

We believe we are highly qualified to assist and guide you through a comprehensive website overhaul. We combine strategic thinking and emerging technologies to provide innovative solutions that consistently break new ground. We develop long-term relationships with our clients. We deliver high-quality work through our focus on bidirectional communication, responsive customer service, client education, accurate project management, product quality, and an ethical approach to business. We have a well-documented track record of performing work on budget and on deadline.

We respectfully submit the following proposal, which includes information about our capabilities, methodology and other pertinent information for consideration.

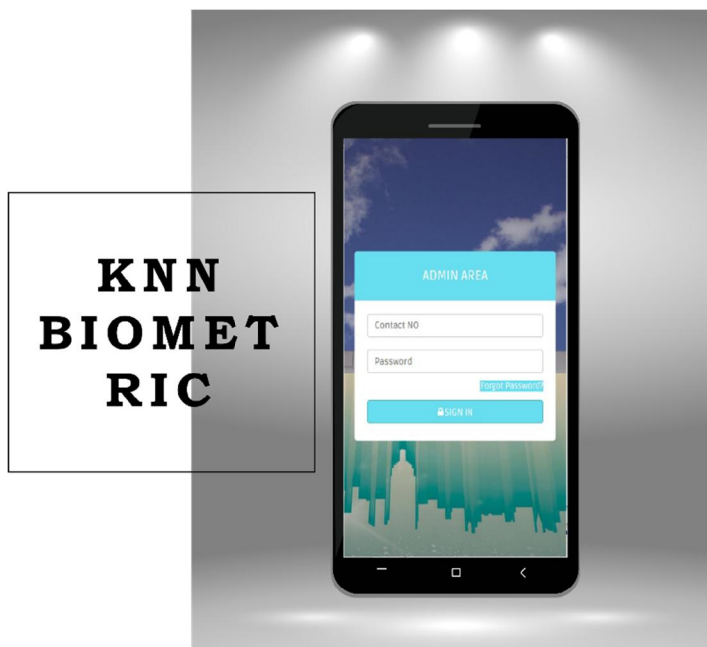

Portfolio

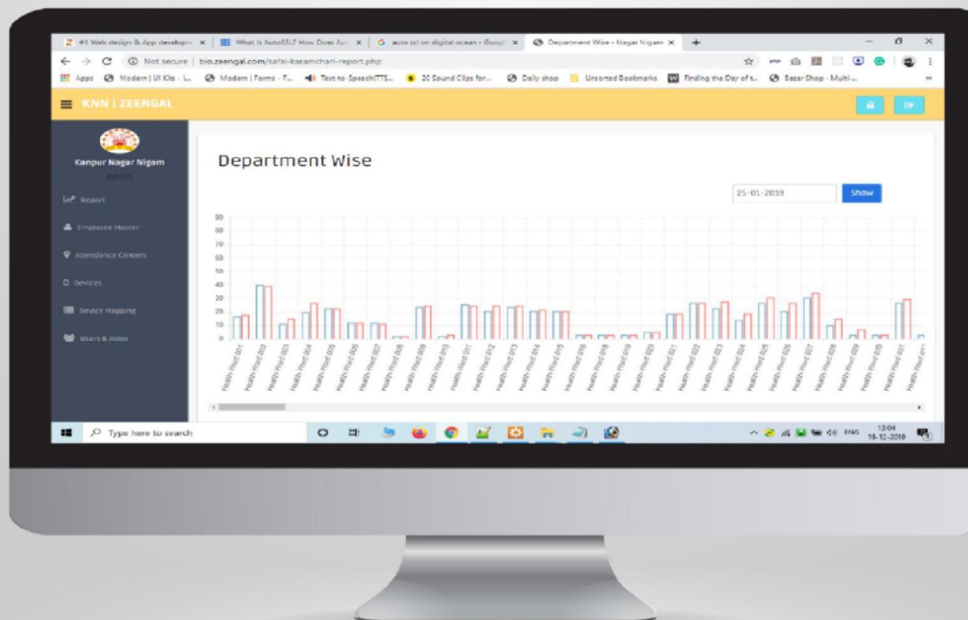

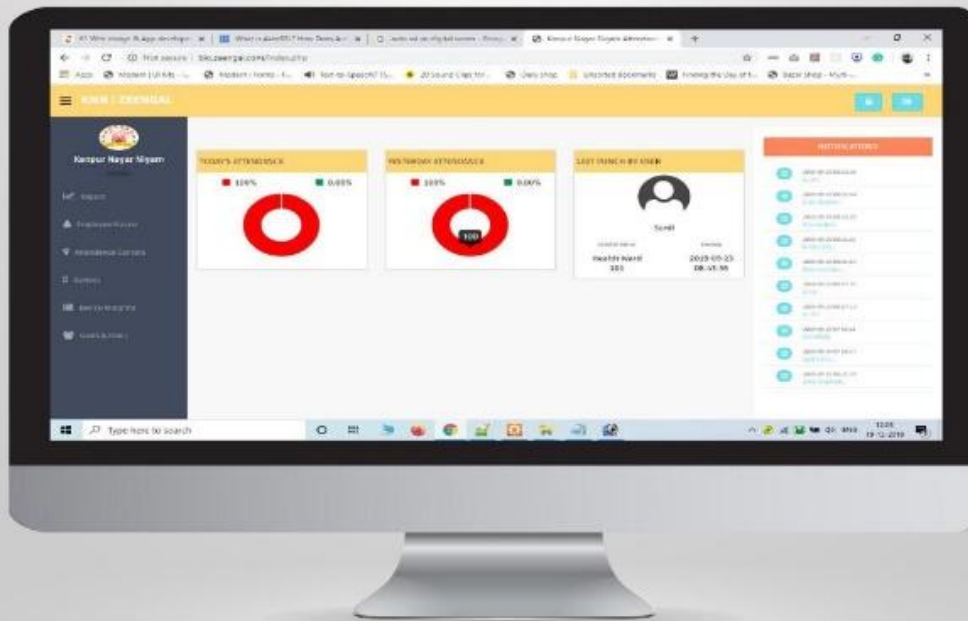

❖ Kanpur Nagar Nigam

Project Name: A Complete Biometric ERP Software

A complete system including ERP software and Biometric Devices was developed for Kanpur Nagar Nigam for the attendance of Cleaning Helpers and their SafaiNayaks.

A biometric device was issued to every SafaiNayak. Devices were mapped with coordinates of their attendance point. The device was programmed to allow SafaiNayaks to take attendance in 1 Km radius of their attendance point only. Registered fingerprints of every employee were loaded in respective devices and mapped on the server. Devices enabled with GPS and GPRS so that real-time attendance could be uploaded to the VPS server. An ERP software was also developed and configured to view device status, today attendance, past attendance, device specific attendance, person-specific attendance, attendance reports, device mapping with the ward, etc.

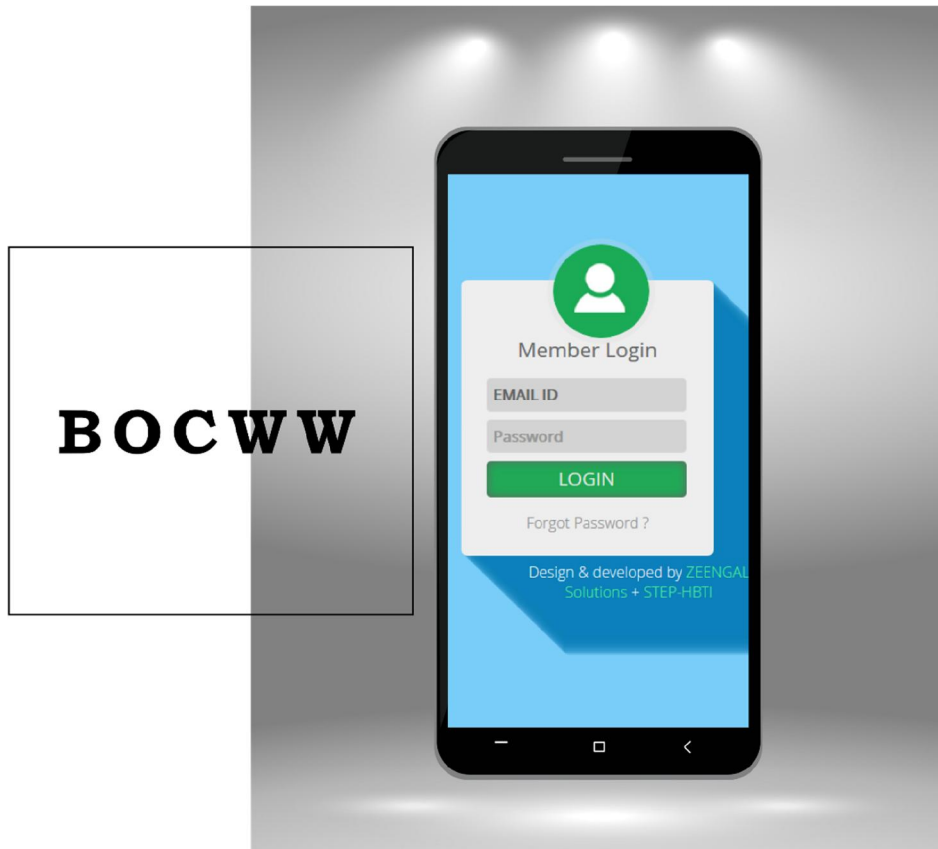

❖ **BOCWW – LUCKNOW:**

Project Name: Bill Collection ERP Software

Every House CESS bill in Lucknow was generated by this portal only. The following ERP software was developed for VikasBuildtechPvt Ltd. The project was assigned to them by BOCWW, Lucknow.

The project was having following functionalities: An on-field survey was done and entries like name of the owner, year of construction, total build area of different floors were recorded in Excel file. Excel files of different localities were uploaded into software. Using an intelligent algorithm software used to detect if there is any mistake in entry and inform the administrator about the errors in file. If file was perfect then entries were made in the database and the bill of every entry was generated by complex calculation according to year, buildup area on different floors, building type, etc. A quite tough months job was completed in a few hours with the help of software.

❖ AROON AVIATION:

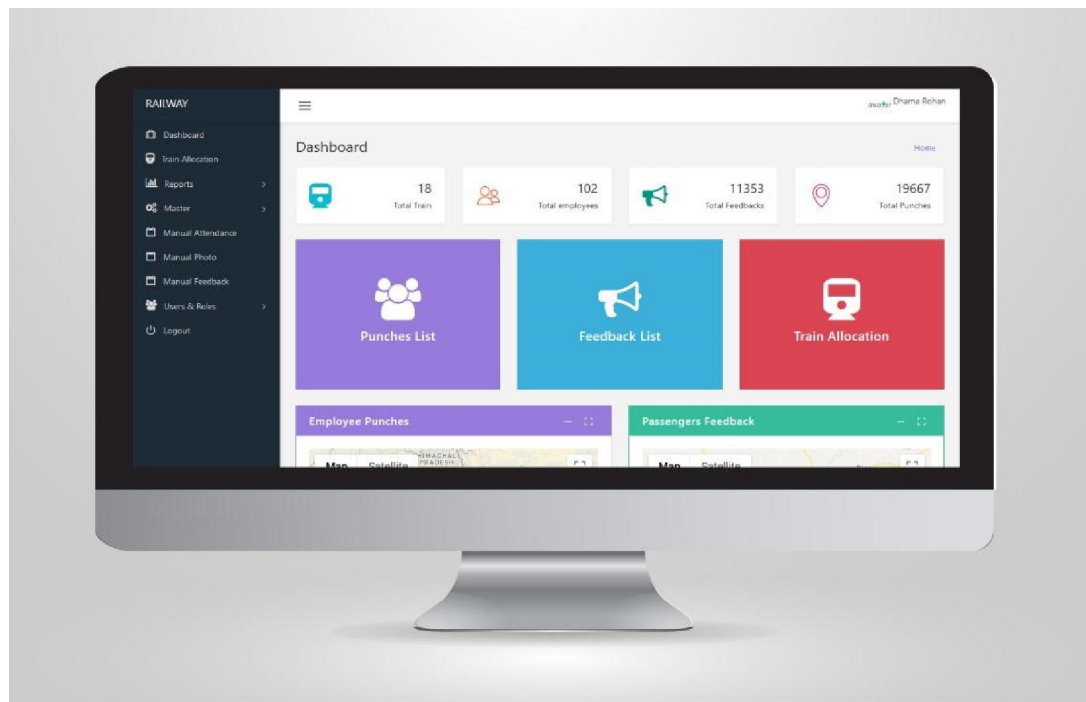

Project Name: RailwayPassengers Feedback ERP Software

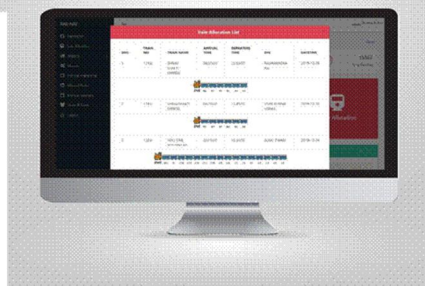

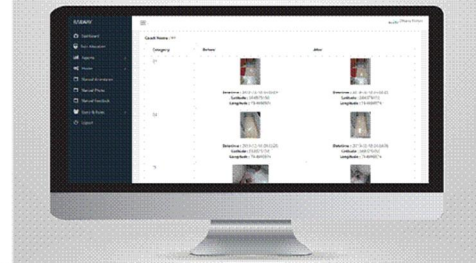

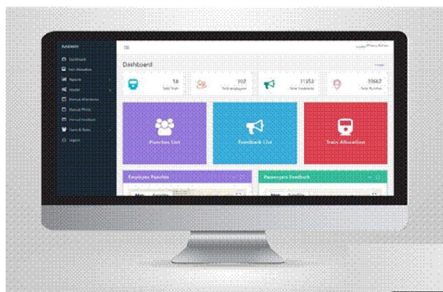

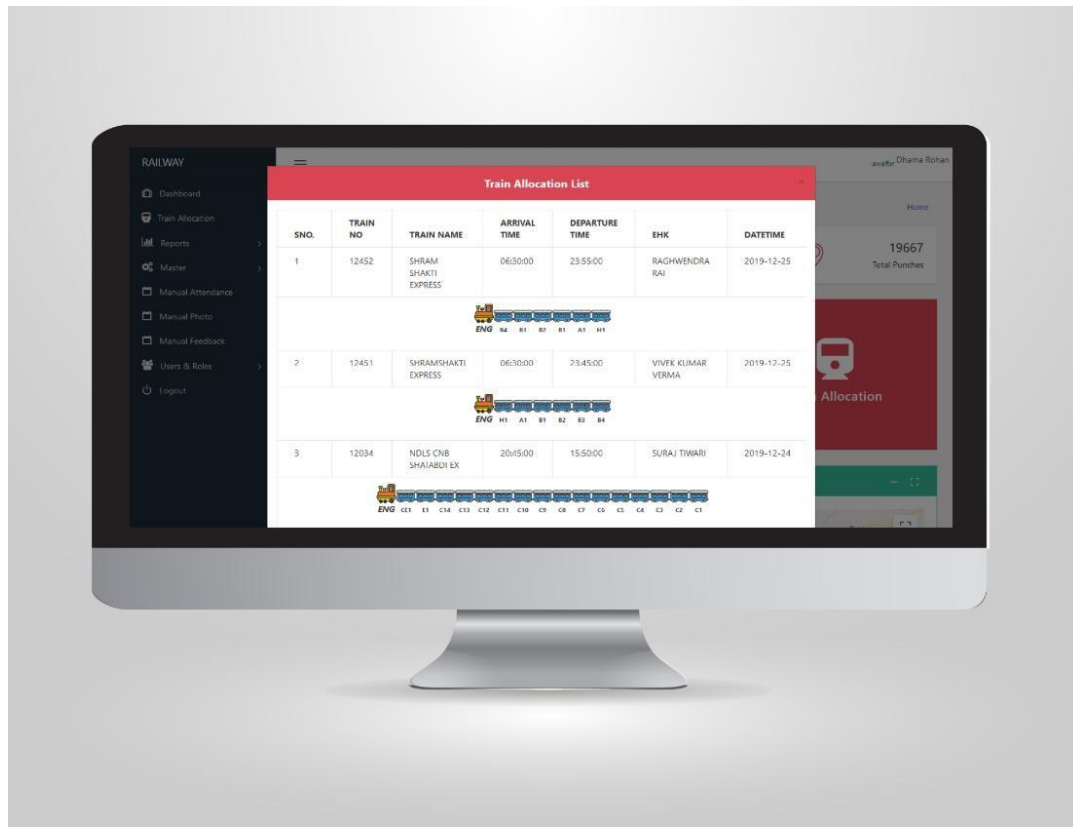

Our whole nation is changing in every field. Shri Narendra Modi himself initiated the cleanliness drive and started Swachh Bharat Mission. Indian Railway had also taken many steps for tracking cleanliness and gathering feedback from passengers. We completed this project with the same goal for Aroon Aviation Pvt Ltd who is working for the India railway on Kanpur and Delhi Railway Station.

The android app is used for mainly 3 purposes:

- To collect rating & feedback of 1 passenger whose birth number is generated randomly from every coach and feedback is verified by OTP on provided mobile number.
- To capture images of toilets and corridors before and after cleaning.
- Biometric attendance of cleaning staff presents on the train.

A User dashboard was enabled for Aroon Aviation and Indian Railway Chief Engineer to monitor daily updates of the above functionalities. Billing, user registration is some other options were also added to the admin dashboard.

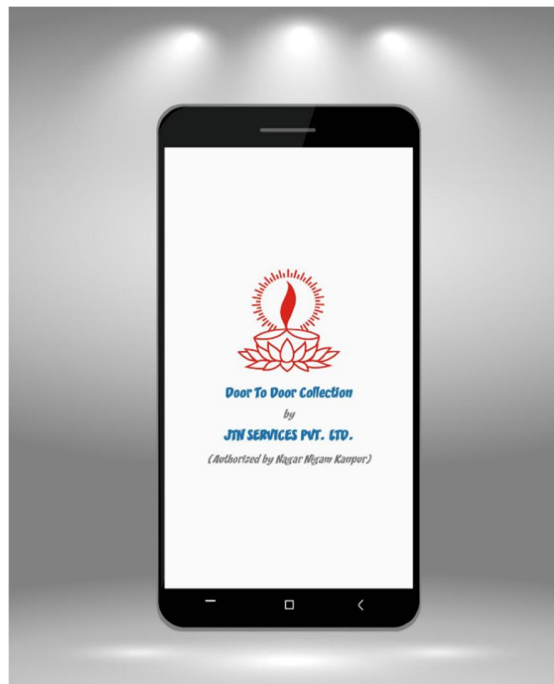

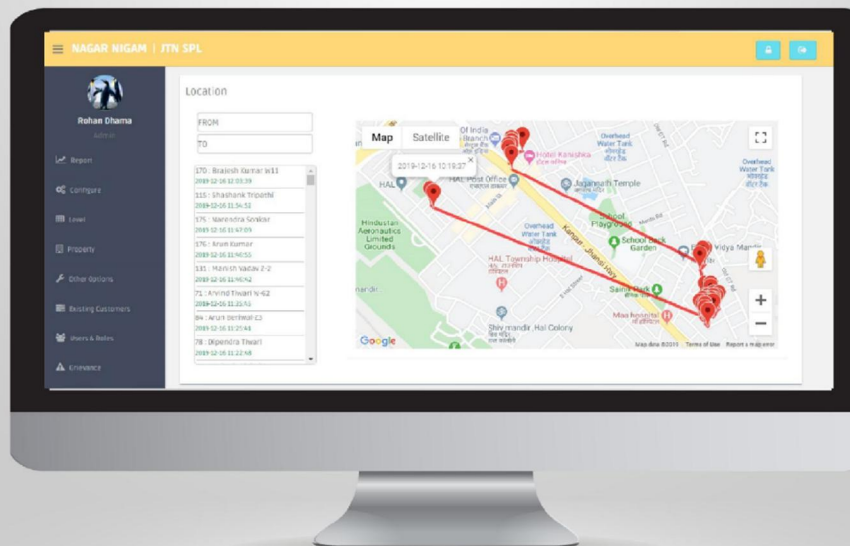

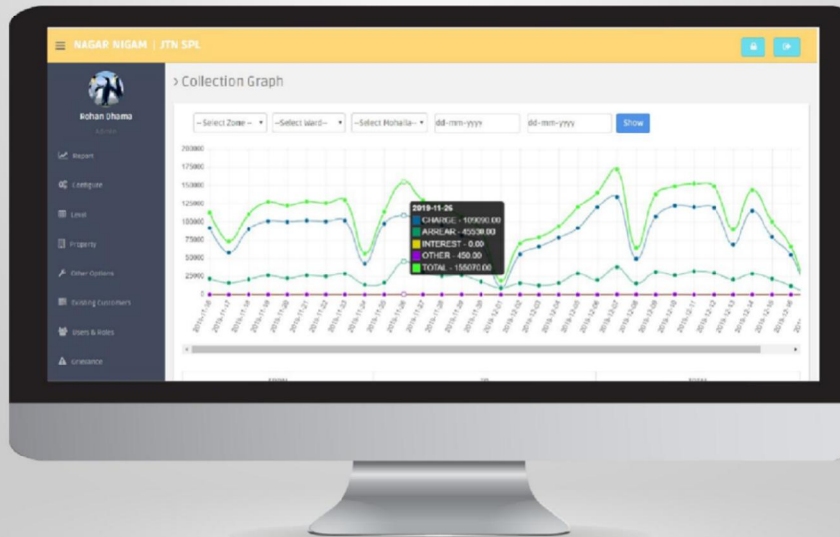

❖ JTN PTV. LTD.

Project Name: A Garbage Collection & Billing ERP Software

This ERP software was used for the Door to Door garbage collection for the Kanpur Nagar Nigam in different Kanpur. The following ERP software was developed for JTN Services Pvt Ltd. The project was assigned to them by Kanpur Nagar Nigam.

The project included an Android App for the survey and dashboard for the monitoring purpose. The whole city was divided into zone, ward, chuck, and mohalla. A supervisor was assigned to every zone who was able to manage operations like assigning App users, monitoring collection, generating reports, GPS Tracking of the surveyor, etc. at his level. The administration had the authority to view any collection of any level and creating users/supervisors at different levels. In the android app, the whole data of customers was downloaded after login. Users can view balance, last bills, category, the vehicle of any customer. Whenever a receipt is printed by the app the transaction was updated on the panel in real-time and Admin could view the details of the transaction. The best feature of the APP was offline data saving i.e. if the internet is not available, then data will be saved in the local memory of APP and will be uploaded to the server instantly after internet availability.

❖ **TECHPRO Pvt Ltd.**

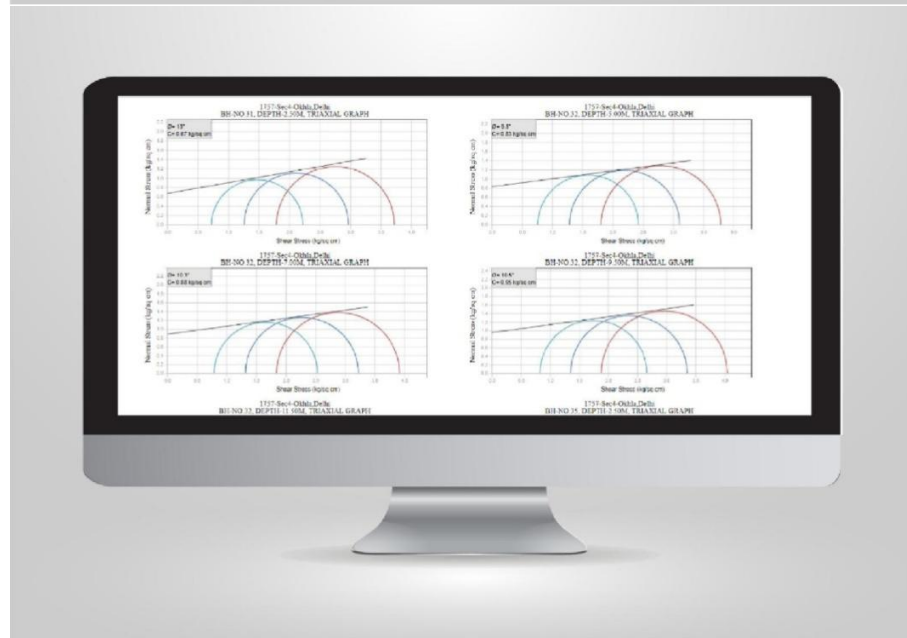

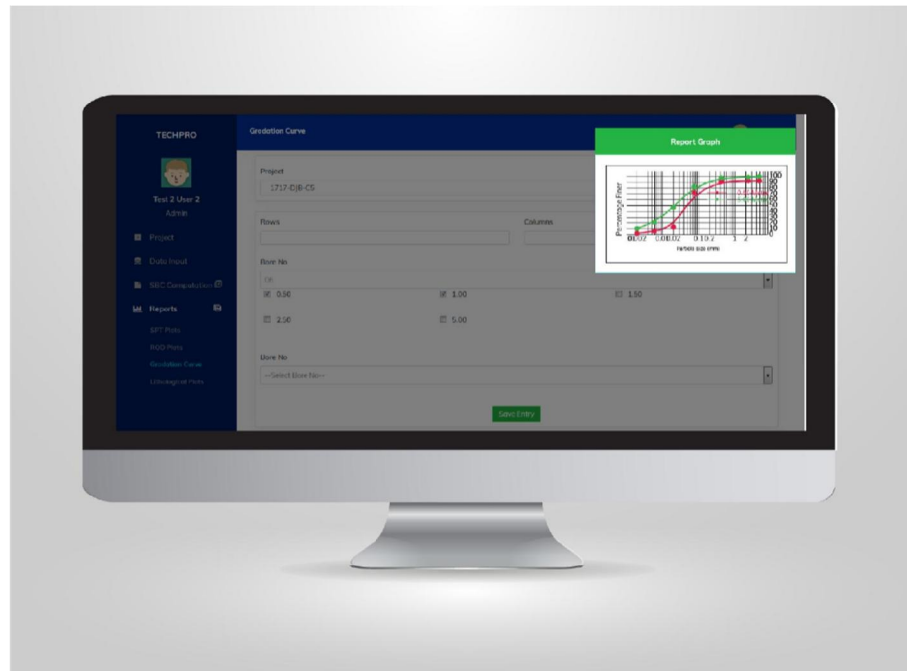

Project Name: An Automation ERP Software

Techpro Engineers Pvt Ltd is in the top 20 organizations of India in the field of soil testing. In soil testing job they need to generate a lot of reports and graphs for clients. Earlier they were working on Excel files using formulas and chart reports but the main problem faced by them was the unavailability of skilled manpower who was trained enough to understand the complex formulas.

Techpro contacted us for the automation issue and to get ERP software developed for automation of reports and graph generation. If anyone wanted to generate an SBC Computation report in open foundation, it normally consumed two to three days as it includes lots of complex calculations.

**Techpro
Engineers
Pvt Ltd**

Overview of the platforms /products developed

❖ Overview:

- ✓ Custom PHP web development framework. It is used to build high-performance complex web applications. More than one developer can effortlessly manage any project. It is an open source framework and becomes the favorite framework for many developers. You can save time and efforts by using the Custom framework. It has a big Scope of expansion.

- Easy Testing
- Large Community
- Better Security
- High Flexibility
- Easy to Use
- Proven Reliability
- Stable and Sustainable
- User-Friendly and Flexibility

❖ Android:

- Java, SQLite & supporting libraries

❖ Dashboard:

- HTML5, CSS3, jQuery, JavaScript, Ajax, PHP, Bootstrap 4.5, MySQL (Open Source Technology)

Solutions Details

Application use for (Users/Workers):

❖ Register/Login Customers:

- Customer registration with basic details name, phone number.
- OTP verification for verify genuine customer.
- After verification immediate login
- Complete basic profile for further solutions like father name, address, locality and other relevant information.

❖ Grievance Process:

- Customer can file grievance multiple time.
- New grievance will base on text and image format.
- Customer will be able to write complain and will be able to take instant image.
- Customer will be able to check current status of each grievance.
- Status and response of particular complain will be resolve by control panel.

❖ Customer Feedback:

- Customer will able to manage all complain.
- View of particular complain with before image and after image(when complain would be resolve)
- Customer will be able to give feedback for particular complain.

❖ Login Process for Worker:

- Official worker will login with valid username and password.
- Official worker username and password will generate through control panel.
- Worker will be able to manage basic profile

❖ **Resolve Complain by worker:**

- Worker will manage number of complains.
- View particular complain
- Update status of complain with text and image format.
- Updated status will show to customer instantly.

❖ **Miscellaneous:**

- Splash Screen of Shahjahanpur Municipal Corporation.
- About Screen of Shahjahanpur Municipal Corporation.
- Instant logout.
- Real Time location of customer and worker.

Web Application or Control Panel scope for Grievance System

❖ **Category Management:**

- Category management for complains. Complain will be based of different category.
- Add, Update and delete category.

❖ **Worker Management:**

- Manage number of worker.
- Add, Update and delete worker.
- .Provide username and password.
- Update password if worker forget in login process.
- Update status of worker active or inactive for app using.

❖ **Category Management:**

- List of all complain.
- View particular complain and check status
- Relevant filters sorting complains

❖ Report Management:

- Complete analysis of complains in tabular format.
- Graphical representation of complain.
- Export CSV for all complain including relevant filter sorting.

Delivery milestone plan

All efforts will be made to deliver this project within the desired delivery window which, at the writing of this scope of work, is **30 business days**.

Events that may delay final delivery or individual milestone delivery include:

50% work

- 15 days
- Cover initial application and control panel structure development

75% work

- 10 days
- Cover half of control panel work

100%
work

- 5 days
- Complete all segments of application and control panel

Commercial details

❖ **Company commercial details:**

- Zeengal Solutions is an **ISO 9001:2015** certified company.
- The company is specializing in web design & development, software development, Android & IOS app development, digital marketing, etc.
- The company is located in **48 Lakhanpur, Vikasnagar Kanpur UP.**
- It was founded in the year 2014.
